

Sapphire

Your Technology Partner

Have you ever lost a potential client because your company didn't have enough resources or expertise to fulfil their requirements?

Do opportunities pass you by because you don't have the technical know how to give your customers a complete solution?

Are you thinking of recruiting technical people to complement your industry expertise but are nervous about entering the IT world?

Do you have an opportunity to build a new business area or website but don't have the resources to do it?

If any of the above apply then partner with Sapphire!!

We have over 20 years experience and expertise in all types of technically based systems and solutions including complex data driven solutions. We specialise in technology-based ventures for all high-level IT requirements such as software development, programming, business and web applications, complex websites and modernisation of legacy systems.

We have partnered with all sorts of companies over the years including design and media companies, travel businesses, specialist technology start ups, software companies and many more.

We have provided a complete range of technology packages to suit each partner profile.

Our areas of expertise include:

Software development

Business application development

Complex websites, especially those requiring:

- integration with databases
- online reservation systems such as hotel, car, holiday and apartment bookings
- content management systems, giving your customers the autonomy to edit the content of their websites themselves
- social media, social networks, blogs & wikis (Web 2.0)
- search engines, eg. property or product searches
- e-commerce

Web applications

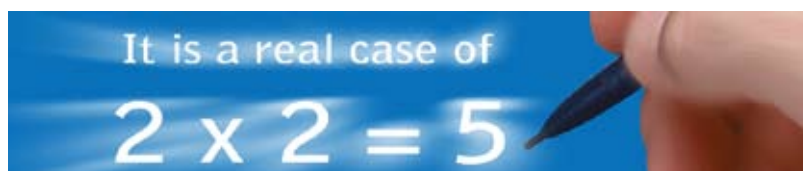

Intranets and extranets

Blackberry integration

Sharepoint systems

Modernising legacy database systems

Resourcing developers offshore

How will it work?

We will provide you with all the technological expertise and “back-end” programming you require so that you can offer complete solutions to your clients. While you concentrate in doing the client interaction we will stay transparently in the background fulfilling your client’s technical specifications.

And what’s more because Sapphire utilises an onshore-offshore model we can transfer all of our cost-savings to you and ultimately the customer gets real value for money!

We can look at innovative ways of financing projects including revenue sharing.

It’s a strategic relationship that works for everyone’s benefit—the client, you and us.
